*A - Added M - Modified D - Deleted

II. Software Requirement Specification

1. Product Overview

The purpose of this document describes in detail the functions of the “website for buying and selling two-handed items”. It illustrates the functions in detail and builds a complete system. It clearly explains the system's constraints, providing an overview of the interface and interactions with the system or other external applications. This document uses the description presented for the customer to better understand the website

- The web-based project management and deployment management system "2hand market" helps the management and implementation of registrations to be done quickly, conveniently and with the least cost. The system was born to sell used products to people in need.
- The service system helps to sell the main objects: Most items from electrical appliances to phones or vehicles.
- The site allows users to register to participate in buying and sell by logging into the system. After registering, customers will be moderated to post their used products for sale or buy products sold on the website.

2. User Requirements

2.1 Actors

#	Actor	Description
1	Guest	As a user accessing the website (not logged in). They can view product an search product,...
2	User	As the user accessing the website (logged in). They can bid, post products they want to sell,
3	Manager	As the manager of posts related to the auction,.....
4	Admin	As a system administrator who has the right to manage all and has the right to ban accounts that show signs of violating the rules of the auction site

Table 1: Actors

2.2 Use Cases

The system has 4 actors, including Guest, User and Admin.

2.2.1 Diagram(s)

2.2.2 Use Cases List

ID	Use Case	Actors	User Case Description
UC - 01	Register	Guest	Create new account
UC - 02	Login	User/ Admin/manager	Login on system
UC - 03	Search product by name	Guest/User	Search to find product
UC - 04	View product	Guest/User	View all product

UC - 05	Filter product by category	Guest/User	View product by filter
UC - 06	Filter product by location	User/Guest	View product by filter
UC - 07	Forgot password	User	User reset password
UC - 08	Logout	User/Admin/Manager	Log out system
UC - 09	Manage Product to sell	User	Manage product
UC - 10	Post product to sell	User	Post product
UC - 11	Manage auctioned product	User	Users with the seller role manage auction
UC - 12	Schedule product auction	User	Users with the buyer role Join and watch the auction
UC - 13	Create auction	User	Users with the seller role create auction posts
UC - 14	View other user's account information	User	Users view other users' personal information
UC - 15	View money in account	User	Users view their money on the system
UC - 16	Deposit money into your account	User	Users deposit money into their accounts
UC - 17	Manage order	User	View and delete product
UC - 18	Buy product	User	Users view posts describing the product and add it to the cart then checkout
UC - 19	Payment	User	The user makes payment via Paypal after receiving an order confirmation from the seller
UC - 20	Mange favorite product list	User	View and delete favorite product
UC - 21	Add favorite product	User	Can add favorite posts and be saved in the favorite products list
UC - 22	Manage messages	User	View, delete and message to other user
UC - 23	Manage account	User	View, update account

UC - 24	Manage category	Admin/Manager	Create, update, delete, view category
UC - 25	Manage all posting	Admin/Manager	View,delete post
UC - 26	Statistics and Report	Admin/Manager	Statistical analysis of data using tables and graphs
UC - 27	Mange all account User and Admin	Admin	Ban,view,update,create account

Table 2: Use cases list

2.2.3 Descriptions

2.2.3.1 Register

UC ID and Name:	UC 01 - Register
Created By:	
Primary Actor:	Guest
Trigger:	Guests must be on the "home page" screen.
Description:	Guests want to register a new account to Order
Preconditions:	Guest does not have an account
Post-conditions:	POST-1: Register Successfully POST-2: The Guest is taken to the "Home page" screen.
Normal Flow:	1. Click the "Register" button at home screen 2. Redirect to the "Register" screen 3. Fill in register form 4. Click "Register" button 5. an OTP is sent to Gmail 6. Enter the OTP to verify the account
Alternative Flows:	N/A
Exceptions:	EX-01: Username is existed in the database EX-02: Email is existed in the database EX-03: Enter incorrect patterns of fields
Priority:	High
Frequency of Use:	High
Business Rules:	
Other Information:	N/A

Assumptions:	N/A
---------------------	-----

Table 3: UC 01 Register

2.2.3.2 Login

UC ID and Name:	UC 02 - Login
Created By:	
Primary Actor:	User, Admin, Manager
Trigger:	Click the "login" button on the login page.
Description:	Actor logs in to the system with an existing account.
Preconditions:	PRE-01: Must have a User account.
Post-conditions:	POST-1: Login Successfully POST-2: The user is taken to the home page.
Normal Flow:	<ol style="list-style-type: none"> 1. Click the "Login" at home screen 2. Redirect to the "Login" screen 3. Fill in username, email and password 4. Click "Login" button 5. When login succeeds, the user is taken to the user home page. 6. When login fails, the system requests them to login again.
Alternative Flows:	N/A
Exceptions:	<ol style="list-style-type: none"> 1. User logged in with the wrong username: The system displays "Account does not exist". 2. User logged in with wrong password: The system displays "Password is not correct"
Priority:	High
Frequency of Use:	High

2.2.3.4 View Product:

UC ID and Name:	UC 04 – View product
Created By:	
Primary Actor:	User, guest
Trigger:	User, guest must press the product.
Description:	User, guest want to view for a product
Preconditions:	PRE-01: Must press picture image.
Post-conditions:	POST-01: Show the information and price products you want to search for.
Normal Flow:	<ol style="list-style-type: none"> 1. Go to the home screen 2. Must click on the product 3. Show products

Alternative Flows:	N/A
Exceptions:	N/A
Priority:	High
Frequency of Use:	High
Business Rules:	N/A
Other Information:	N/A
Assumptions:	N/A

Table 6: UC 04 View product

2.2.3.5 Filter product by category

UC ID and Name:	UC 05 - Filter product by category
Created By:	
Primary Actor:	Guest,User
Trigger:	The guest/user must prees category they want to find.
Description:	The guest/user who visits the website can see the list of products
Preconditions:	PRE – 01: When the guest/user they will use the search by category and see products.
Post-conditions:	POST-01: The list of products by category names will appear.
Normal Flow:	1. User, Guest standing at home screen 2. When the user,guest click on the category,the list of products with related names will appear in the table below.
Alternative Flows:	N/A
Exceptions:	N/A
Priority:	High
Frequency of Use:	High
Business Rules:	N/A
Other Information:	N/A
Assumptions:	N/A

Table 7: UC 05 Filter product by category

2.2.3.6 Filter product by location

UC ID and Name:	UC 06 - Filter product by location
Created By:	
Primary Actor:	User, Guest
Trigger:	The user/guest choose search by location.
Description:	The guest/user who visits the website can see the list of products
Preconditions:	PRE – 01: When the guest/user they will use the search by category and see products.
Post-conditions:	POST-01: The list of products by category names will appear.
Normal Flow:	1. User, Guest standing at home screen 2. When the user, guest click on the category ,the list of products with related names will appear in the table below.
Alternative Flows:	N/A
Exceptions:	N/A
Priority:	High
Frequency of Use:	High
Business Rules:	N/A
Other Information:	N/A
Assumptions:	N/A

2.2.3.7 Manager product to sell

UC ID and Name:	UC 07 – Manage Product to sell
Created By:	
Primary Actor:	User
Trigger:	User will post the products to sell
Description:	After the user post products the products will up to the manager to censorship and the products will up to sell

Preconditions:	PRE-1: Users must log in to the system. PRE-2: The product must be suitable and not on the prohibited list.
Post-conditions:	POST-01: User will waiting the product will be evaluated and approved.
Normal Flow:	1. Click to download product image and select item of product type 2. Update product price 3. Wait for the administrator to approve 4. Products will be updated to selected categories.
Alternative Flows:	N/A
Exceptions:	N/A
Priority:	High
Frequency of Use:	High
Business Rules:	N/A
Other Information:	N/A
Assumptions:	N/A

Table 9: UC 07 Manage product to sell

2.2.3.8 Post products to sell

UC ID and Name:	UC 08 – Post product to sell
Created By:	
Primary Actor:	User
Trigger:	User will post the products to sell.
Description:	After the user post products the products will up to the manager to censorship and the products will up to sell
Preconditions:	PRE-1: Users must log in to the system. PRE-2: PRE-3: The product must be suitable and not on the prohibited list.
Post-conditions:	POST-01: User will waiting the product will be evaluated and approved.
Normal Flow:	1. Click to download product image and select item of product type 2. Update product price 3. Wait for the administrator to approve 4. Products will be updated to selected categories.
Alternative Flows:	N/A
Exceptions:	N/A

Priority:	High

3.2.2 Register

- Trigger: The Guest want to register an account to use the Second hand market system
- Description: Provide a page for guests register an account to use the Second hand market system
- Function detail:

- + Validation: User must fill all field to register an account.
- + Functionality: Register an account
- Screen layout:

The screenshot shows a registration form titled "Đăng ký" (Register) with a purple lock icon. The form contains the following fields:

- Họ * (Last Name)
- Tên * (First Name)
- Địa chỉ email * (Email address)
- Mật khẩu * (Password)
- Xác nhận mật khẩu * (Confirm password)

 Below the fields is a purple button labeled "Gửi OTP" (Send OTP). At the bottom, there is a small link: "Bạn đã có tài khoản? Đăng nhập" (Do you have an account? Log in).

Figure 11: Register

3.2.3 Forgot password

- Trigger: User forgot password and want to reset the new password.
- Description: Provide a page for user who want to get the link resetting password from user email or username
- Function detail:
 - + Validation: User must fill email or username to get link for reset the password, username or email must be registered in system.
 - + Functionality: Reset the password
- Screen layout:

3.3 Profile

3.3.1 Change password

- Trigger: User, manager want to change password.
- Description: Provide a page for user, manager to change password
- Function detail:
 - + Validation: User, Manager must fill all field to change the password, new password and confirm password must be the same, the old password must be the same as the current password.
 - + Functionality: Change the password

3.4 Buyer services

3.4.1 View all product to buy

- Trigger: User, Guest want to view list product current in Secondhand market system.
- Description: Provide a page for User, Guest can view list product
- Function detail: Show all list product.

- Screen layout:

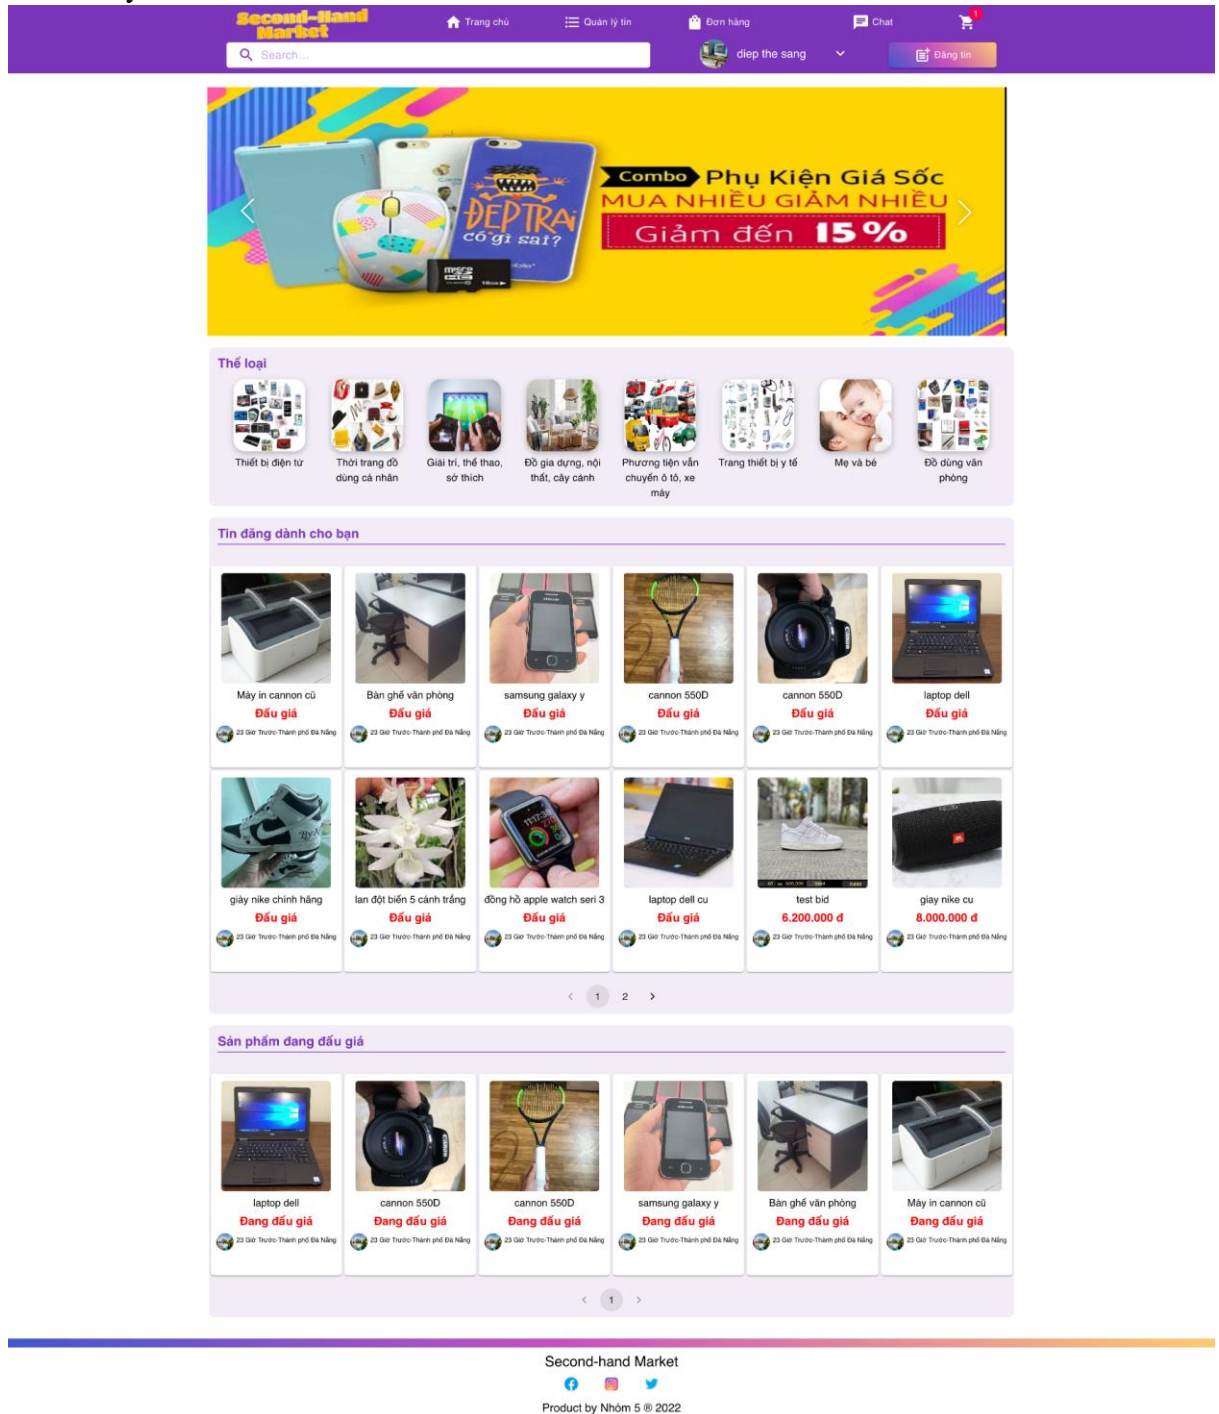

Figure 17: View all product to buy

3.4.2 Search product

- Trigger: User, Guest want to search list product current in Secondhand market system.
- Description: Provide a page for User, Guest can search list product
- Function detail: Show all list product that same the name User, Guest search.

- Screen layout:

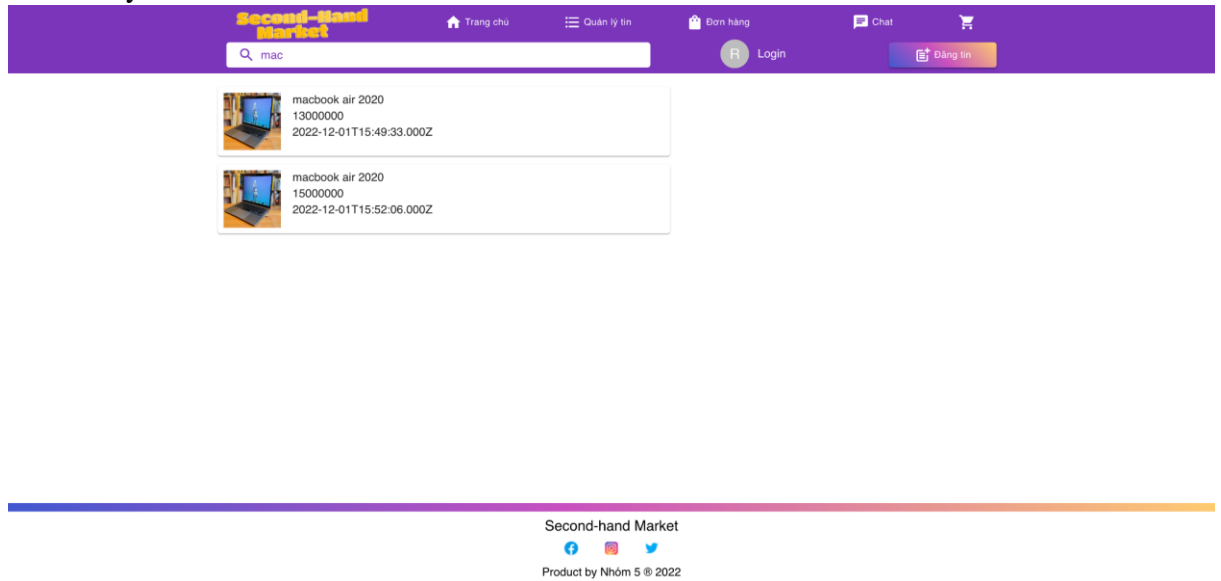

Figure 18: Search product

3.4.3 Filter product by category

- Trigger: User, Guest want to filter list product current in Secondhand market system.
- Description: Provide a page for User, Guest can filter list product
- Function detail: Show all list product that same the name User, Guest filter.
- Screen layout:

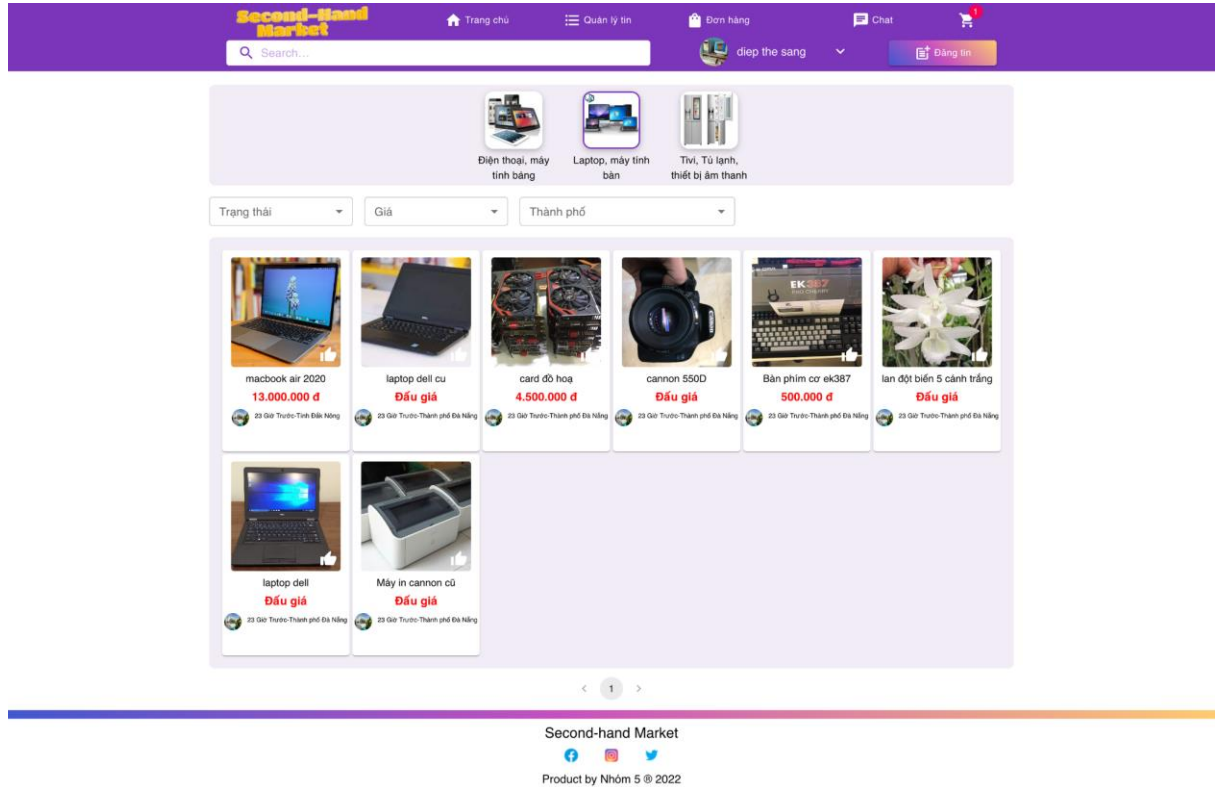

Figure 19: Filter product by category

3.4.3 Filter product by location

- Trigger: User, Guest want to filter list product current in Secondhand market system.
- Description: Provide a page for User, Guest can filter list product
- Function detail: Show all list product that same the name User, Guest filter.
- Screen layout:

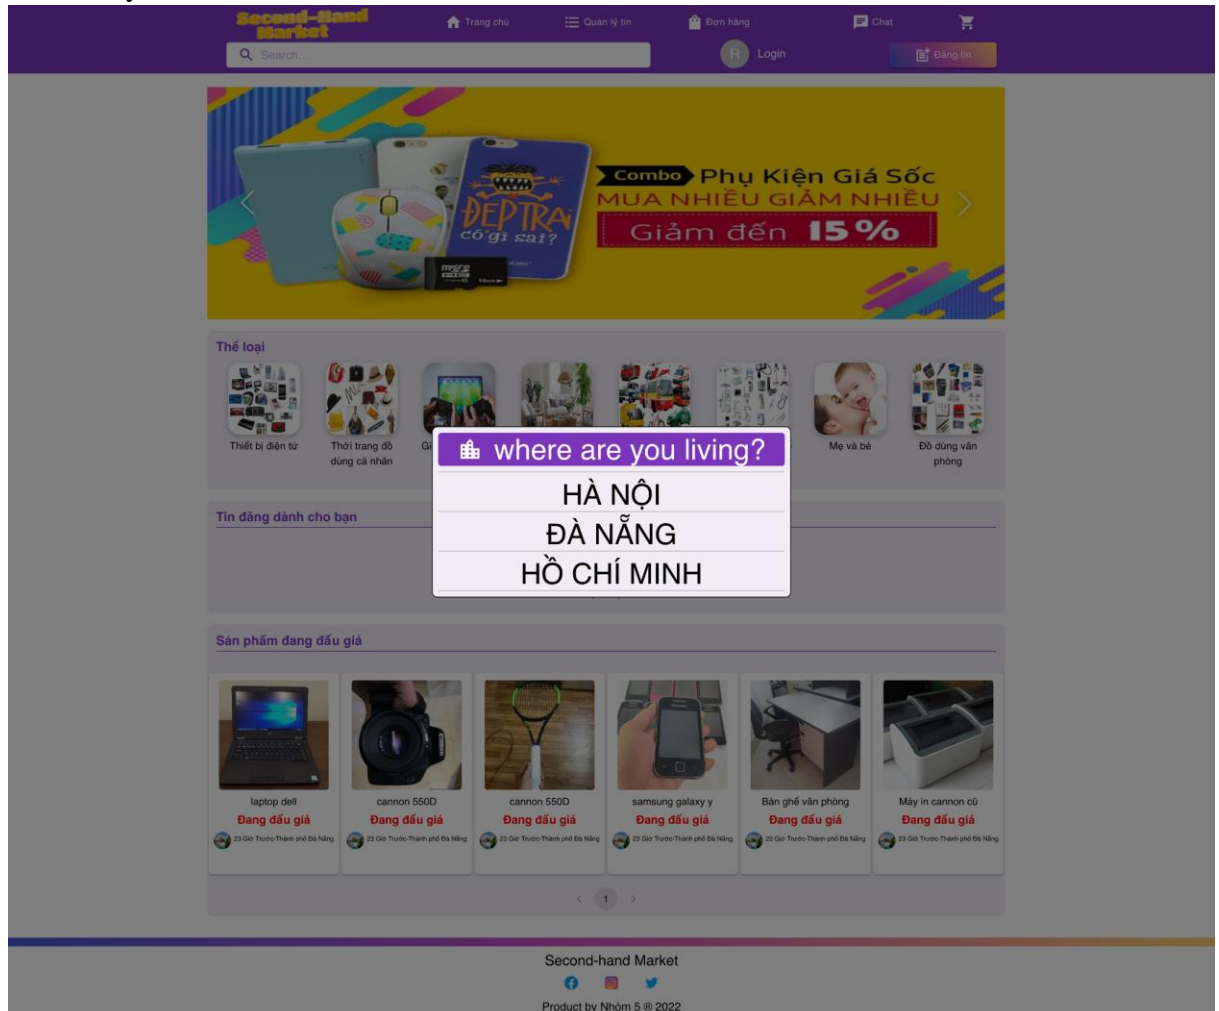

Figure 20: Filter product by location

3.4.4 View product detail

- Trigger: User, Guest want to view detail product in Secondhand market system.
- Description: Provide a page for User, Guest can view product detail
- Function detail: Show all list product that same the name User, Guest search.

- Screen layout:

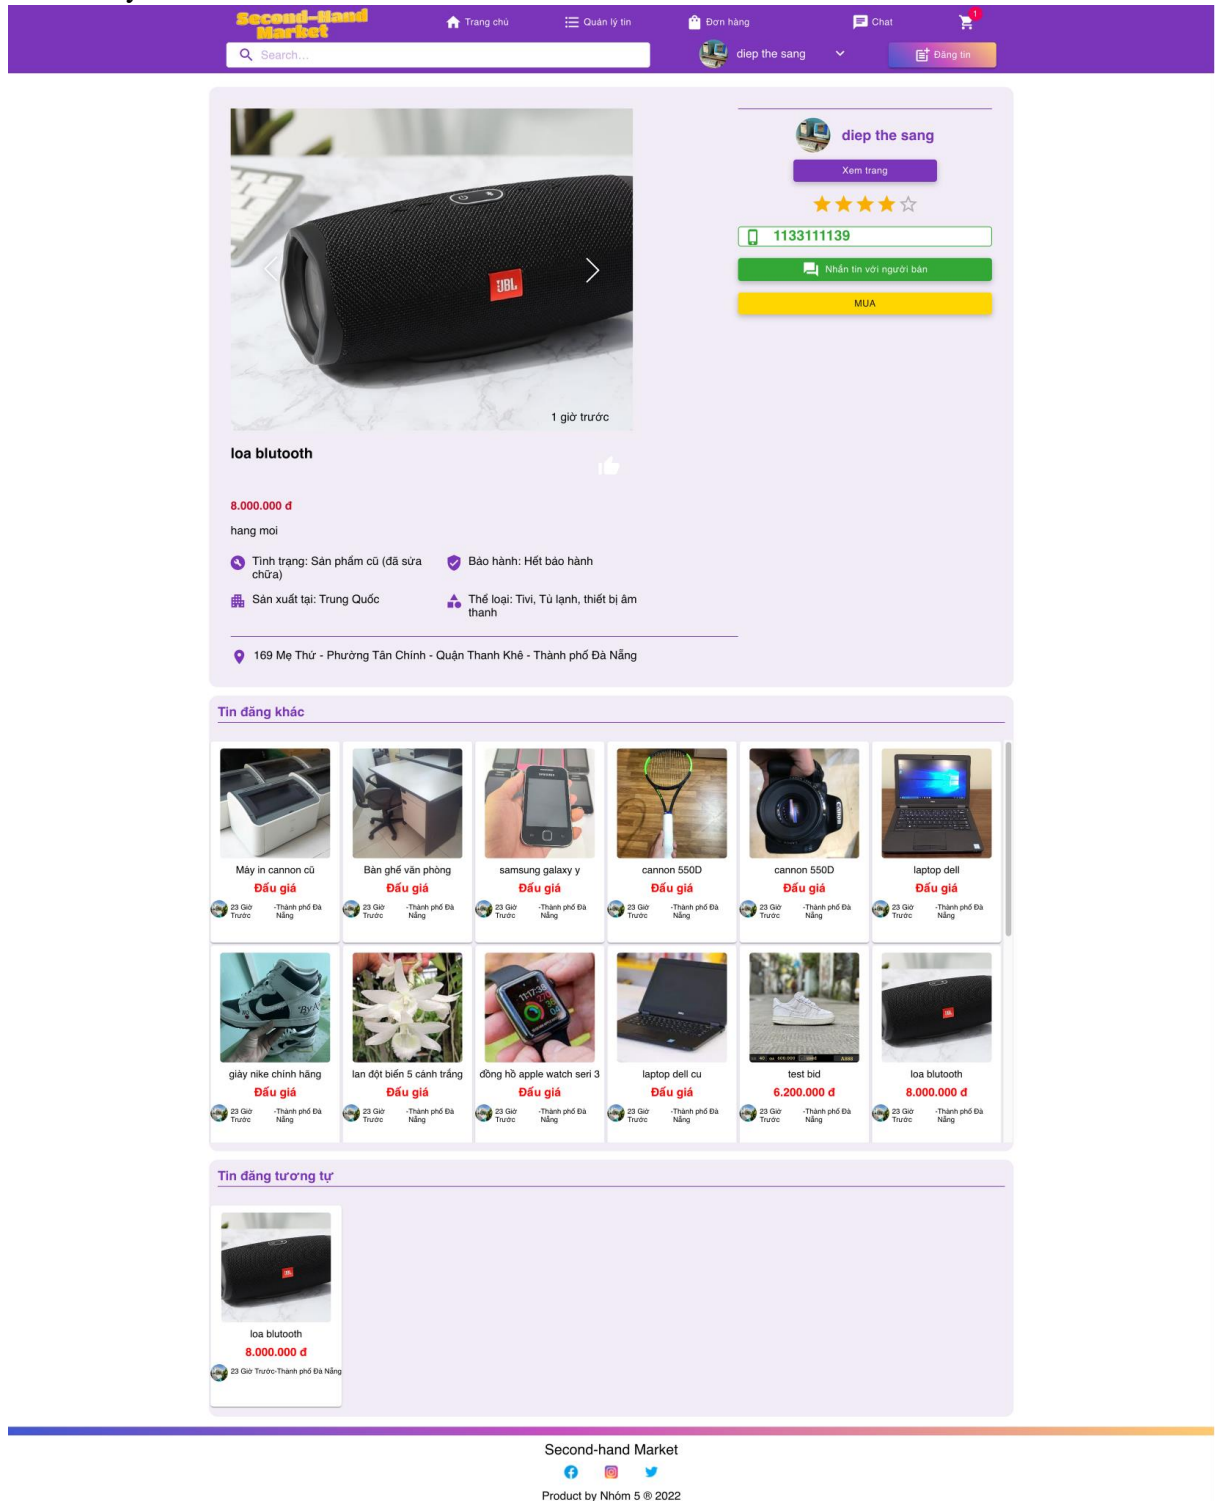

Figure 21: View product detail

3.4.5 Buy product

- Trigger: User want to buy product in Secondhand market system.
- Description: Provide a page for User can buy product in Secondhand market system.
- Function detail: Buy product for user

- Screen layout:

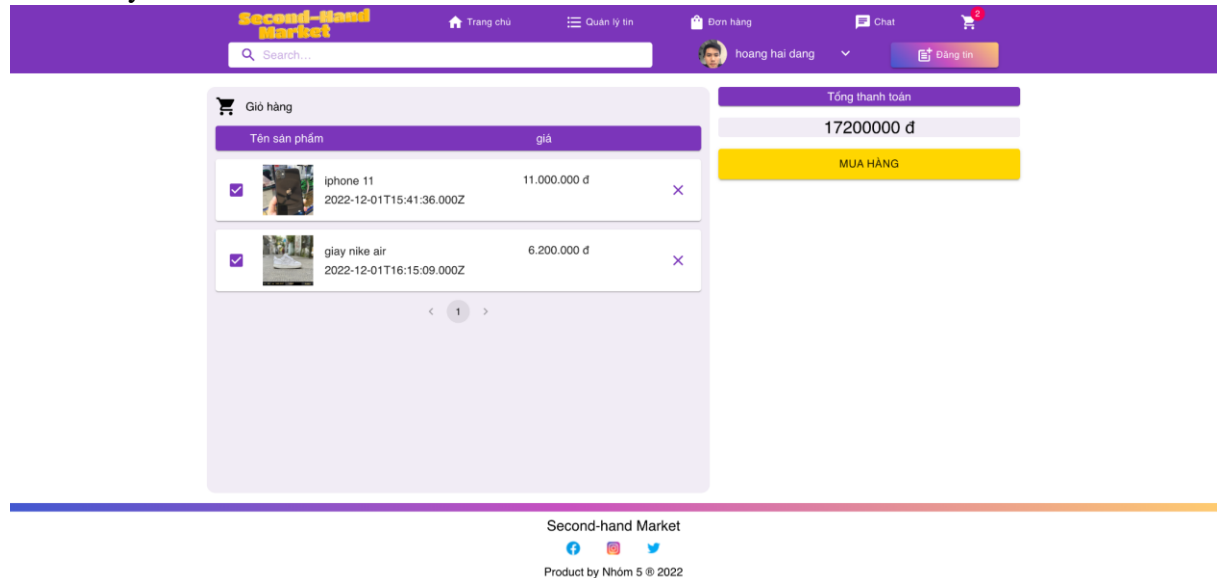

Figure 22: Buy product

3.4.5 Auction product

- Trigger: User want to auction product in Secondhand market system.
- Description: Provide a page for User can auction product in Secondhand market system.
- Function detail: auction product for user

- Screen layout:

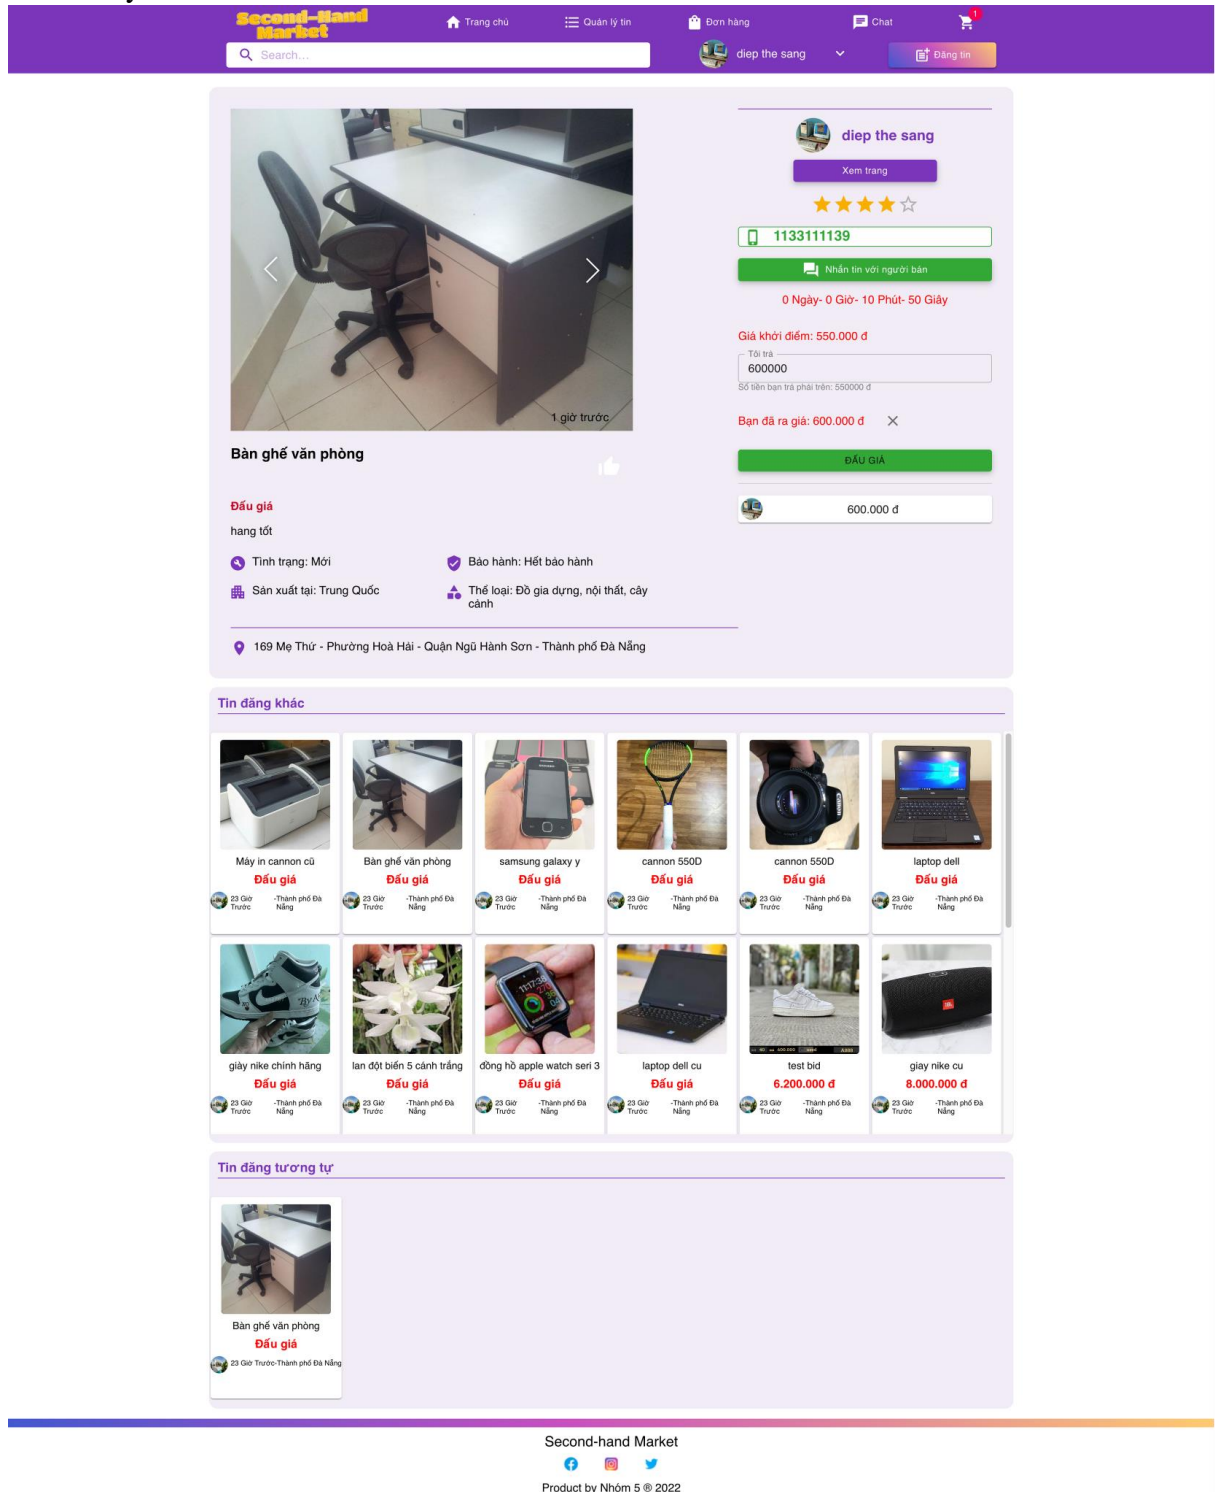

Figure 23: Auction product

3.4.6 Manage order

- Trigger: User want to manage order in Secondhand market system.
- Description: Provide a page for User can manage order in Secondhand market system.
- Function detail: manage order for user

- Screen layout:

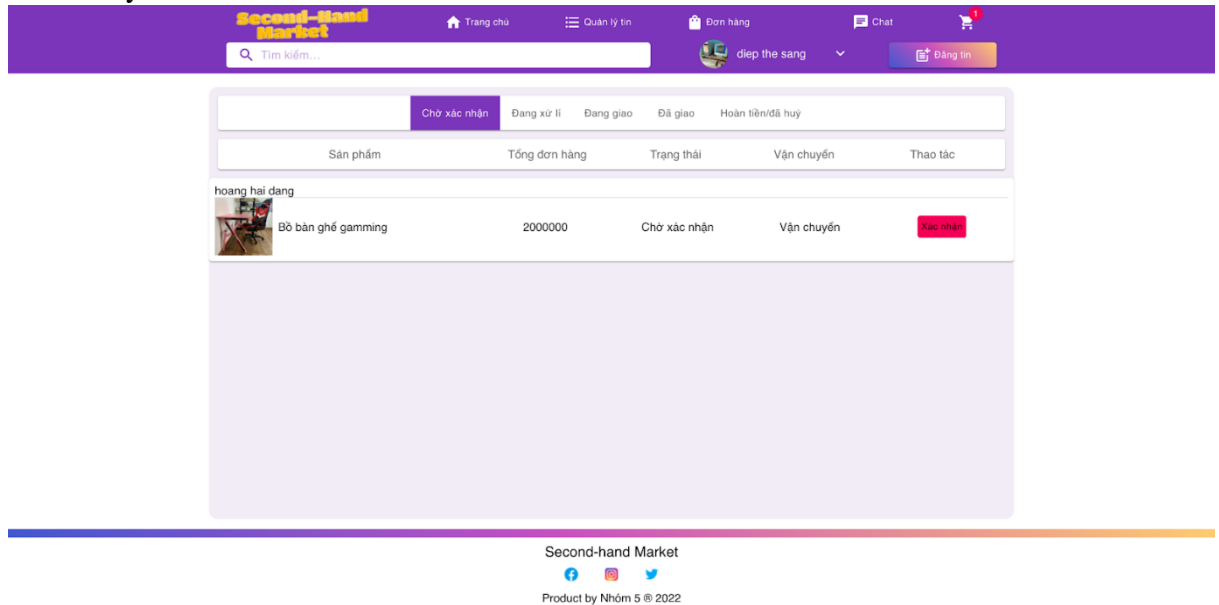

Figure 24: Manage order

3.5 Seller services

3.5.1 Create post to sell

- Trigger: User want to create product to sell in Secondhand market system.
- Description: Provide a page for User can create product to sell
- Function detail: Create product to sell

- Screen layout:

The screenshot displays the 'Second-hand Market' web application interface. At the top, there is a purple navigation bar with the logo 'Second-hand Market' and several icons for home, account, orders, chat, and a shopping cart. Below the navigation bar is a search bar and a user profile section. The main content area is a form for creating a new post. On the left, there is a large area for adding an image, labeled 'Thêm hình ảnh'. On the right, there is a form with the following fields: 'Thể loại' (Category), 'Tên sản phẩm' (Product Name), 'Trạng thái sản phẩm' (Product Status), 'Bảo hành' (Warranty), 'Sản xuất tại' (Produced in), 'Mô tả' (Description), 'Giá *' (Price), 'Tỉnh/Thành phố' (Province/City), 'Huyện/Quận' (District), 'Xã/Phường' (Commune/Ward), and 'Đường' (Road). There are also two checkboxes: 'Sản phẩm dùng để cho tặng' (Product used for donation) and 'Đấu giá' (Auction). At the bottom of the form is a purple button labeled 'TAO BÀI VIẾT'. The footer of the page includes the text 'Second-hand Market', social media icons, and 'Product by Nhóm 5 © 2022'.

Figure 25: Create post to sell

3.5.2 Create post to auction

- Trigger: User want to create product to auction in Secondhand market system.
- Description: Provide a page for User can create product to auction
- Function detail: Create product to auction

- Screen layout:

The screenshot displays the 'Second-hand Market' website interface. At the top, there is a purple navigation bar with the site logo, a search bar, and links for 'Trang chủ', 'Quản lý tin', 'Đơn hàng', 'Chat', and a shopping cart icon. Below the navigation bar, the main content area is divided into two sections. On the left, there is a large light purple box with a camera icon and the text 'Thêm hình ảnh'. On the right, there is a form titled 'TAO BÀI VIẾT' (Create Post) with the following fields: 'Thể loại' (Category), 'Tên sản phẩm' (Product Name), 'Trạng thái sản phẩm' (Product Status), 'Bảo hành' (Warranty), 'Sản xuất tại' (Produced in), 'Mô tả' (Description), 'Giá *' (Price), 'Tỉnh/Thành phố' (Province/City), 'Huyện/Quận' (District), 'Xã/Phường' (Commune/Ward), and 'Đường' (Road). There are also two checkboxes: 'Sản phẩm dùng để cho tặng' (Product for donation) and 'Đấu giá' (Auction). The footer of the page includes the text 'Second-hand Market', social media icons, and 'Product by Nhóm 5 © 2022'.

Figure 26: Create post to auction

3.5.3 Manage product to sell

- Trigger: User want to manage product to sell in Secondhand market system.
- Description: Provide a page for User can manage product to sell
- Function detail: Manage product to sell

- Screen layout:

Figure 27: Manage product to sell

3.5.4 Manage post auction

- Trigger: User want to create product to auction in Secondhand market system.
- Description: Provide a page for User can create product to auction
- Function detail: Create product to auction

- Screen layout:

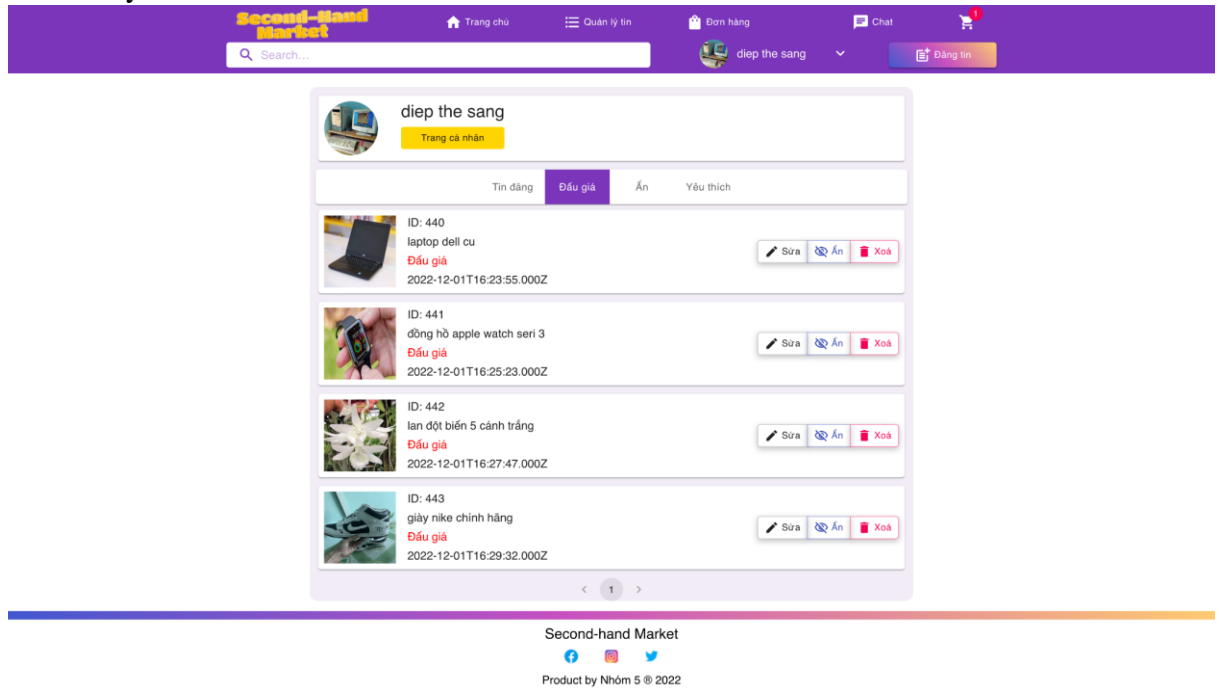

Figure 28: Manage post auction

3.5.4 Schedule auction

- Trigger: User want to create product to auction in Secondhand market system.
- Description: Provide a page for User can create product to auction
- Function detail: Create product to auction

- Screen layout:

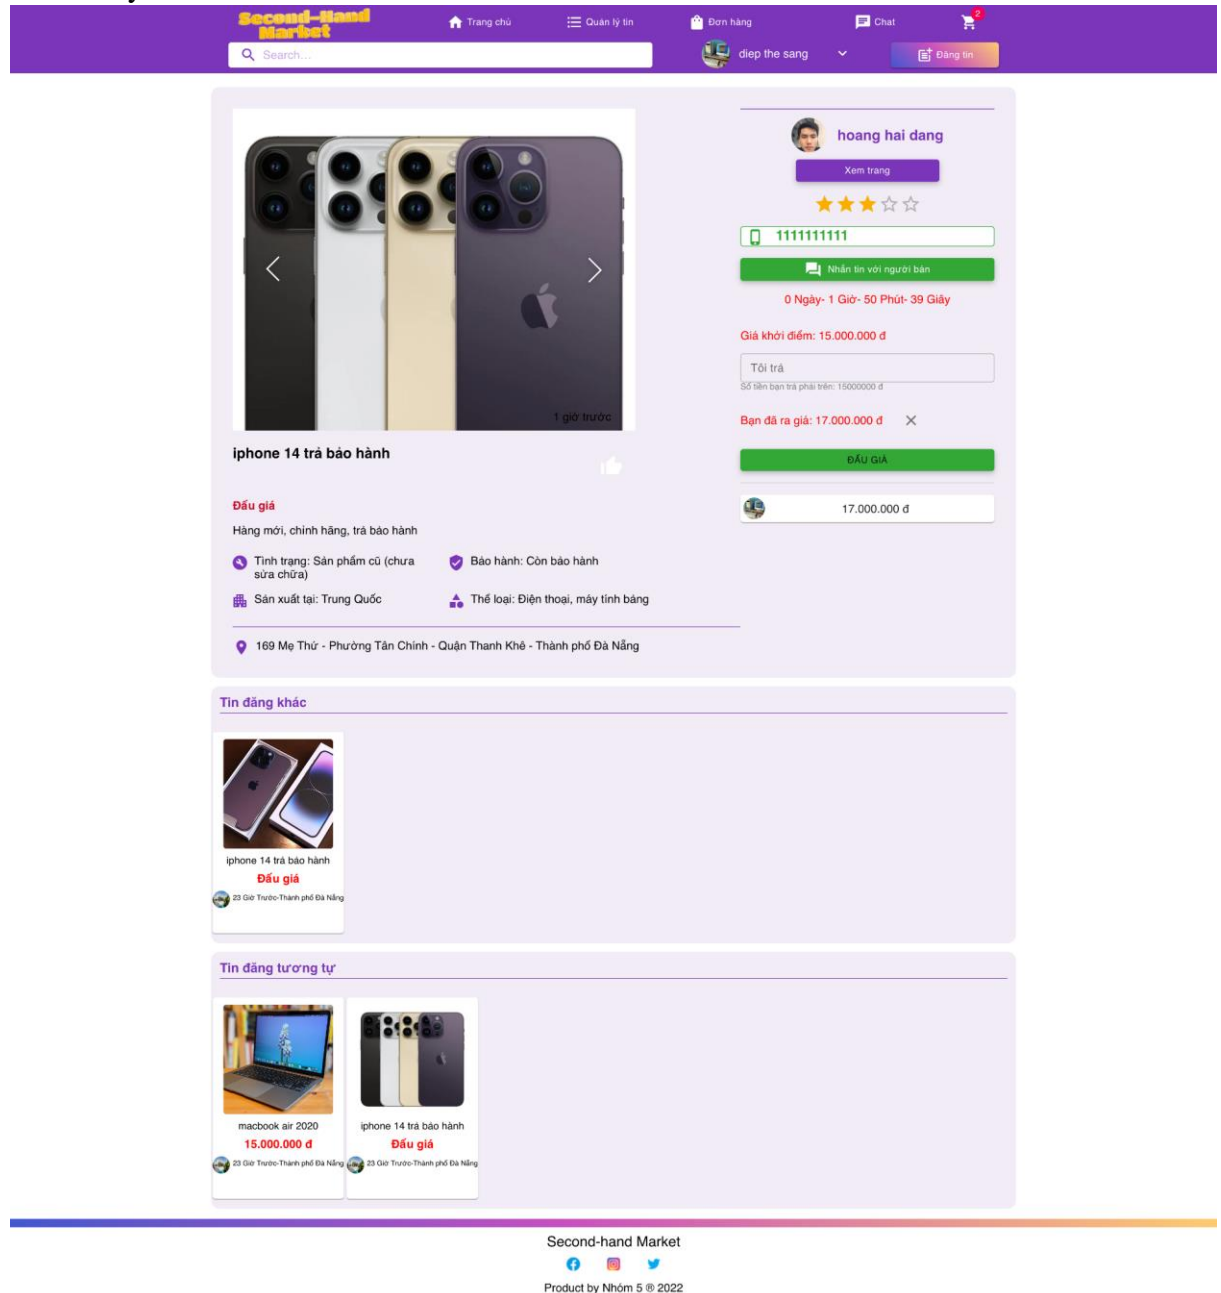

Figure 29: Schedule auction

4. Non-Functional Requirements

4.1 External Interfaces:

- Our product has no external interfaces.

4.2 Quality Attributes

4.2.1 Usability

- The user interface should be friendly, simple, logical, and easy to use.

- All the texts and messages should be precise, consistent, and easy to understand.
- Buttons and checkboxes should be made easy for the user to tap.

4.2.2 Security

- The system must use JSON Web Token (JWT) authentication, in which the authentication server returns an access token after the user logs in with an email and password. Then the client will include the access token in the subsequent requests to access protected resources.
- The system must use HTTPS to encrypt the information transferred between clients and servers.
- Password must be hashed before inserted into the database.

4.2.3 Performance

- Front end using React JS, which was designed to provide high performance in mind. The core of the framework offers a virtual DOM program and server-side rendering, which makes complex apps run extremely fast.
- Back-end system uses NodeJS to develop fast web server.

4.2.4 Maintainability & Scalability

- Using RESTful API for the backend architect to help improve scalability.
- We use some stuffs on GitHub Apps is Codacy, CodeCov to check coding quality. In a single merge request, they can run automatically to check our codes. Though we only merge code when all checks passed (we can restrict who can push to matching branches without passing all CI)

5. Requirement Appendix

5.1 Business Rules

Domain business rules:

No	Description
BR-1	Only admin can manage manager
BR-2	Guests can only buy products when they have registered an account
BR-3	Guests can only view items that are listed for sale
BR-4	User can view and buy or bid on any item
BR-5	All users can post for sale or auction
BR-6	User can view information of other users
BR-7	User can rate the product quality after purchasing from another account
BR-8	When admin or Manager accounts have been disabled an account, this account will automatically log out from the system and cannot log in again.
BR-9	Manager has the right to show and hide posts that violate the policy
BR-10	Manager can ban accounts that violate the policy

Table 32: Domanin bussiness rules

Specific business rule:

No	Description
BI-1	The field must be filled by 10 numbers.
BI-2	The field must be filled, followed by format “X@X.Y”, where X is characters and Y is alphabets. X and Y are at least 1 character.

Table 33: Specific bussiness rule

5.2 Common Requirements

5.3 Application Messages List

#	Message code	Message Type	Context	Content
1	MSG01	Under the text box	Input-required fields are empty	<i>Please fill out this field.</i>
2	MSG02	Toast message	Updating asset(s) information successfully	<i>Update asset(s) successfully.</i>
3	MSG03	Toast message	Adding new asset successfully	<i>Add asset successfully.</i>
4	MSG04	Toast message	Deleting asset information successfully	<i>Delete asset(s) successfully.</i>
5	MSG05	Toast message	Updating asset(s) information failed	<i>Update asset(s) failed.</i>
6	MSG06	Toast message	Adding new asset <i>failed</i>	<i>Add asset failed.</i>
7	MSG07	Toast message	Deleting asset information <i>failed</i>	<i>Delete asset(s) failed.</i>
8	MSG08	Under input field	Username or password is not correct when clicking sign-in	<i>Incorrect user name or password. Please check again.</i>
9	MSG09	Under input field	Input an invalid information	<i>Invalid asset</i>
10	MSG10	Toast message	Take attendance successfully	<i>Take attendance successfully for [username]</i>
11	MSG11	Toast message	The face recognized is not the same with the face registered	<i>Wrong face detected</i>
12	MSG11	Toast message	Upload photo successfully	<i>Image is successfully trained for [userid]</i>
